

CLOUDHOSTING PROJECT PROFILE

ACE MICROSERVICES CLOUDHOSTING

Ace Micro Services is a Cloud solutions are cost effective, reliable, accessible and secure.

The cloud offering includes;

- Cloud Connect Backup as a Service (Cloud BaaS)
- Cloud Connect Disaster recovery as a service (Cloud DRaaS)
- Infrastructure as a service (IaaS)
- Hosted apps platform offerings for some key business applications

Key features of our cloud services include;

- IaaS on demand instead of outright purchase of hardware
- Infrastructure is scalable and elastic to suit the clients' needs
- Cost savings realized by clients through elimination of purchase and maintenance of hardware
- Limited failure/ downtime as data is on the cloud
- Pay as you go model which eliminates the capital expenses of deploying one's own infrastructure
- Guaranteed availability of running applications and minimal downtime
- Backup as a service for the applications hosted

MYDAWA

- In a country where more than 48 million people look for pharmacies as their first stop to find medical relief, counterfeit medication becomes a very real health risk. MYDAWA provides a solution that ensures safe, reliable and affordable products that are conveniently and privately delivered to the end user. Through collaborative efforts with the doctors, regulators and pharmacies, MYDAWA sought a platform that leverages technology to digitally ensure safe, reliable and affordable products are delivered to the end user.
- MYDAWA provides a platform for users to conveniently order for drugs, medical devices and wellness products from the comfort of their phones or through a web app and collect at approved collection points or delivered to their doorstep. MYDAWA is the first exclusive on-line pharmacy in the region.

MYDAWA contracted Ace Micro Services to offer cloud hosting services i.e. Infrastructure-as-a-Service. This is where we have provided computing resources complemented by storage and networking capabilities to run applications that are run and administered by MYDAWA. The applications running from the cloud include; MYDAWA website (www.mydawa.com), Microsoft Dynamics applications.

Ace Micro Services is responsible for the following as a cloud service provider;

- The maintenance and upgrades of tools, database and operation systems running
- Security in terms of encryption and against malware and virus attacks
- Backup as a service for the systems hosted on the cloud

DAC AVIATION

- DAC Aviation founded in the early 1990s, started operating in Kenya in August 2006. DAC was looking to cut operational and capital expenses in terms of investing in hardware to run their business-critical applications.
- Ace Micro Services proposed to provide Infrastructure as a service, where we provide computing resources according to the needs of DAC Aviation.

Accessibility of their business-critical applications is through a secure remote tunnel and they can run operations from anywhere.

Ace Micro Services is responsible for the following as a cloud service provider:

- The maintenance and upgrade of tools, database and operation systems that are running.
- Security in terms of encryption and against malware and virus attacks.
- Backup as a service for the systems hosted on the cloud
